

Non tilting-magazine eliminates the hassle of filling from the top down, load product right where you need it.

Built in Bag Vender available on all models

The separately locking cash box keeps you in control of the money while your attendant keeps the vender filled.

The new mounting bracket makes hanging your vender quicker, easier, and safer than before.

Bases for all three models available.

VENDMASTER SERIES COIN/DEBIT

120n

Cabinet dimensions:
15 3/8" W x 45 1/8" H x 11 1/2" D
Weight: 105 lbs.

240n

Cabinet dimensions:
30 5/8" W x 45 1/8" H x 11 1/2" D
Weight: 210 lbs.

360n

Cabinet dimensions:
46 1/16" W x 45 1/8" H x 11 1/2" D
Weight: 315 lbs.

The VendMaster 120n is an electronic 4 column vender with a capacity of 116 vends. This vender is networkable - meaning it is expandable up to 12 columns. The features include an Imonex series R7 coin drop, which accepts the Sacagawea Dollar Coin and quarters. This coin drop does not make change. The electronics of this vender offer Multi pricing, accountability and self-diagnostics. The cabinet offers a locked cash box, three point locking system, direct fill magazine and two-door design which allows you to service the vender without blocking the aisle. The lower door functions as a shelf for easy filling.

The Debit version functions with any Multi-priced platform system. The hook up is thru an MDB cable and in many cases no additional power source is necessary. The Debit version has all of the electronic features (except the Imonex R7 coin drop) and cabinet features (except the cash box) of the Coin version. This vender has the smallest footprint of any 4 column vender and two networked venders have the exact footprint of our previous VM240. Hinged wrap around Security Guards and bases are available for all three models.

VENDMASTER 894

The VendMaster 894 is an 8 column, 184 box capacity coin-slide-driven machine. This vender features a proven direct drive dispensing system used in our two, three and four column machines. Empty weights lock out the column when out of product, cutting down on user abuse. The new three door design allows you to service the vender without blocking the aisle. All locks feature a three point locking system. The 894 can be equipped with ESD, Greenwald or Monarch Vertical 5 coin slides, which adjust from .25¢ to \$1.25. Model pictured with the available hinged wrap around Security Guard. Locks sold separately.

Cabinet dimensions:
42" W x 43 5/8" H x 9" D
Weight: 190 lbs.
